BLOG!

This one-of-a-kind overseas fieldwork curriculum equips students with the skills to become professional photographers while preparing them to thrive in the professional world. Over 180 days of fieldwork in Asia, students engage with local cultures and communities through photography, broadening their international outlook and developing their personal values. The program enables students to deeply explore the themes they are passionate about while mastering essential techniques applicable to all genres, including both studio work and on-location fieldwork.
